

Primary Sense Reports for Health Assessments

Primary Sense can provide reports based on real-time data, allowing practices to monitor performance and focus on clinical outcomes. The features and functionality of reports can support roles across the practice team. Generated reports are automatically saved to a folder on the computer, enabling data comparison over time.

Accessing reports for Health Assessments

At the top of the Primary Sense sidebar menu: click **Reports** and select keyword filter: **Health Assessments**

Quick tip!
Search within a patient's My Health record to ascertain if a Health Assessment has been provided elsewhere

 <p>Health Assessments Eligible or due</p>	<ul style="list-style-type: none"> Identify patients eligible for health assessments: 45 to 49 years, 75+ years, or Aboriginal and Torres Strait Islander patients. Check that MBS billing has not been accessed elsewhere for this item. Drill down to a particular cohort of patients for recall using complexity scores or risk scores.
<p>For further interrogation of data to target specific areas otherwise not highlighted, reports can be exported to Excel or CSV for enhanced manipulation and filtering.</p>	

Quality improvement (QI) opportunities

<ul style="list-style-type: none"> Develop a process to recall patients that may be eligible for a 75+ years Health Assessment
<ul style="list-style-type: none"> Develop a process for recalling Aboriginal and/or Torres Strait Islander patients that may be eligible for an Indigenous Health Assessment
<ul style="list-style-type: none"> Identify individual patients who are 45 to 49 years with a higher chronic disease risk score and/or diabetes risk score that may be eligible for a Health Assessment.
<p>For more information about QI, refer to the QI Tool Kit that is designed to help general practice teams undertake QI activities by providing a range of useful information, resources, tools and templates.</p>

Further information
