

Health Professional Education Event

Patient-centred communication when treating chronic pain Integrating Motivational Interviewing

This workshop will include a conceptual overview of current evidence around the integration of motivational interviewing for supporting treatment of patients with chronic pain as part of a biopsychosocial model of care in the primary care setting.

Learning Outcomes

- Understand systematic clinical assessment and history taking of chronic pain.
- Apply Motivational Interviewing as a therapeutic approach to improve chronic pain treatment adherence.
- Understand Cognitive Functional Therapy as a biopsychosocial model of care with chronic pain patients.

Our Expert Speaker

Peter O'Sullivan (PhD, Specialist Musculoskeletal Physiotherapist (FACP)) is John Curtin Distinguished Professor of Musculoskeletal Physiotherapy at Curtin University and Specialist Musculoskeletal Physiotherapist at Body Logic Physio. He is recognised internationally as a leading clinician, researcher and educator in the management of complex musculoskeletal pain disorders.
