

The Advance Project™

**Become a champion practice
and give your patients a voice in their end of life choices.**

Advance care planning is an important step in ensuring a person's preferences and values are known at the end of their life. General practice has an opportunity to start these discussions with patients because trust has already been established.

WA Primary Health Alliance is working with Hammond Care to support Western Australian general practices to implement a team-based approach to initiating advance care planning and palliative care into everyday clinical practice. The Advance Project is a practical, evidence based toolkit and training package, specifically designed to support general practices to deliver team-based care.

Expressions of Interest

We are seeking expressions of interest from four practices across WA to become champion practices to participate in this project.

To be a champion practice we ask that you:

- 1 Complete the online training.
- 2 Become familiar with The Advance Project resources.
- 3 Attend a three hour workshop with your practice team.
- 4 Use The Advance Project resources with your patients.
- 5 Become involved with the evaluation of the project, by asking patients and carers to complete a survey.
