WAPHA LEARNING WEBINAR

Webinar Series: Advancing Multidisciplinary Team Care in General Practice

Presented by WA Primary Health Alliance in partnership with AGPAL

As general practice in Western Australia adapts to ongoing funding reform and increasing complexity in patient needs, this two-part interactive webinar series offers timely, targeted support for teams delivering multidisciplinary team (MDT)-based care.

Whether you're a GP, nurse, allied health professional, practice manager or support staff, these CPD-accredited webinars will provide practical tools and strategies to enhance coordination, efficiency and equitable outcomes for all patients.

Each webinar is accredited for 1 RACGP EA CPD hour and includes an expert-led presentation, real-world case studies and a live Q&A segment to deepen understanding and facilitate application to your own practice. Join us to strengthen your team's capability and stay ahead of system reform.

Webinar 1: Tuesday 3 June 2025 at 1pm

Opportunities and Challenges of MDT-Based Care

- Introduction to PHN reforms and their impact on general practice.
- The challenges of implementing MDT care in real-world settings.
- Success stories: chronic disease management and social prescribing.
- The NUKA-inspired model and its relevance for Australian practices.

Webinar 2: Tuesday 17 June 2025 at 12pm

Enhancing MDT Workflows

- MDT workflow principles in action.
- Standing orders, full scope-of-practice frameworks.
- Digital tools for coordination and workflow management.
- Tailored approaches for mainstream, rural and disadvantaged settings.
