

Proudly presented by King Edward Memorial Hospital in partnership with HealthPathways and WA Primary Health Alliance

# Real women, real care: managing the interface between primary and specialist care for young women

**Saturday, October 24, 2020**  
8.00 am to 2.30 pm  
*Hosted at King Edward Memorial Hospital, Agnes Walsh House Lounge*  
RSVP by 15<sup>th</sup> of October 2020

This activity has been approved for 18 CPD Activity (formerly Category 2 QI&CPD) points through RACGP and pending approval for 6 Educational Hours through ACRRM.

## CPD Education

Provide GPs with the opportunity to receive updated and evidence based information regarding the care of young women who shift between primary care and the specialist services at KEMH.

**Registrations are essential as this event will be capped.**

**Meet professionals providing speciality healthcare at KEMH, have open conversations and form relationships!**

### Learning Outcomes

- ❖ Identify the limitations of first trimester screening tests
- ❖ Demonstrate awareness of contraceptive options for adolescents
- ❖ Discuss current STI prevalence and risk factors in Western Australia
- ❖ Demonstrate awareness of anaemia management options in primary care and when to refer for specialist management
- ❖ Discuss optimum timing for antenatal discussion of appropriate postpartum contraception

### Topics

- ❖ Reproductive carrier screening
- ❖ Adolescent contraception
- ❖ Syphilis and STI in pregnancy
- ❖ Post-partum contraception
- ❖ Gestational diabetes
- ❖ Use of COCP in 2020
- ❖ Investigation of anaemia in pregnancy and management
