

## WAPHA GP LEARNING

# GP Telehealth Webinar

Using telehealth can significantly improve GP workload by streamlining workflows, improving efficiency and ultimately providing faster and more convenient patient care.

Offering telehealth services at your practice, in conjunction with standard face-to-face consults, expands primary care opportunities and the benefits for you and your patients.

During this webinar, we will explore the benefits of using telehealth in general practice, discuss some scenarios of video-call telehealth and touch on considerations to keep in mind when conducting a telehealth appointment.

There will also be time reserved for a Q&A session.

### Learning outcomes:

- Recognise opportunities to adopt telehealth in your practice.
- Identify the benefits of using telehealth.
- Understand the best use of telehealth.
- Understand how to appropriately conduct a telehealth video-call appointment.

## DETAILS

📅 Thurs 21 Nov

🕒 6pm to 7pm  
(AWST)
