Event information:

The role of general practice (GP) is not formally defined in the State Health Emergency Response Plan, leaving GPs and practice staff without inclusion across prevention, preparedness, response and recovery (PPRR) activities. The GPERT webinar will explore how the project will define the role of GP in disaster for WA.

The following topics will be covered:

- State emergency management arrangements as they relate to primary care providers.
- Health response and disaster management in WA.
- Primary health's role in prevention, preparedness, response and recovery (PPRR) in disaster and emergency.
- How stakeholders can contribute towards shaping the GPERT model by completing the survey.

Event details:

 **Monday 18 March 2024**

 **5pm – 6pm (AWST)**

 **To register, [click here](#) or scan the QR code below**
