Preparing for PIP QI with PEN CS

Practice information sessions

In preparation for the Practice Incentives Program Quality Improvement (PIP QI) payment, due to commence on 1 August 2019, WA Primary Health Alliance is facilitating training sessions to support practices who wish to learn more both about the incentive, as well as using the PEN CS tool to support ongoing quality improvement in your practice through the evaluation of your practice data.

The sessions are tailored both to practices that are new to data sharing and quality improvement, as well as those experienced users who have an advanced knowledge.

The sessions will cover:

- What we know about PIP QI so far
- Putting together a PIP QI preparedness plan
- What is the PENCAT tool and how can it be used to drive QI?
- How to get the most out of using the PEN Clinical Audit Tools
- Interpreting PENCAT data successfully to assist in QI measures within your own practice
- Q&A Open Forum PENCAT tips and tricks

Both face-to-face and online sessions are available, with attendees only needing to attend one session.

To register, please visit http://bit.ly/PENQI_Training_June or visit <https://bit.ly/2KUK2Lx> to download the flyer for more information and session times and venues.

As sessions commence on 18 June, we encourage you to register as soon as possible to ensure you can attend your preferred session.

1800 2 ASSIST (1800 2 277 478) | support@practiceassist.com.au | www.practiceassist.com.au

WA Primary Health Alliance is supported by funding from the Australian Government under the PHN Program.

Rural Health West is funded by the Australian Government Department of Health and the WA Country Health Service.

Shared Debt Recovery Scheme – fact sheet and FAQs

The Shared Debt Recovery Scheme (the Scheme) commences under the Health Insurance Act 1973 on 1 July 2019. The Scheme enables the Commonwealth to hold both a practitioner (primary debtor) and another party (secondary debtor) responsible for repayment of compliance debts, arising as a result of incorrectly claiming Medicare benefits, through the making of a shared debt determination.

The Scheme was introduced because Medicare billing is often delegated to non-practitioners, administered through centralised billing areas and can be influenced by organisational processes and policies. In some instances, this has led to incorrect billing practices. The Scheme is designed to encourage practitioners and organisations to work together to minimise incorrect billing, respond to Medicare audits, and promptly repay debts arising from incorrect Medicare billing.

The Scheme applies when the Department of Health conducts post-payment Medicare compliance audits. The Department's audit process is an evidence-based assessment of a provider's compliance with relevant requirements in relation to the payment of a Medicare benefit, and is conducted in accordance with the Health Insurance Act. Audits are not undertaken to determine the clinical appropriateness of the service delivered to the patient.

To assist practitioners to understand the intent and processes of the Shared Debt Recovery Scheme, the Department has established a Fact Sheet webpage (accessible by visiting <https://bit.ly/2MTs2Pr>) as well as a Frequently Asked Questions page (accessible by visiting <https://bit.ly/2Fen0XD>), or you can email the Department on HC.consultation@health.gov.au with your specific queries.

Type 1 Diabetes Education Event – 16 July

You are invited to the Type 1 Diabetes Family Centre for an update on the latest information regarding the management of Type 1 Diabetes, along with the opportunity to tour the facilities available to your patients and their families.

Find out more about:

- new technologies
- updates on current research
- hypoglycaemia prevention strategies
- dietary strategies
- sick day diabetes management

For more information on the event, please visit <https://bit.ly/2FeExij> to download the flyer, or email metro.phn@wapha.org.au.

This event can also be found in the *Education and training* section of this edition.

Launch of the South West Health Professionals' Network

On Wednesday, 26 June, the South West Professionals' Network will have its official launch. The Network will provide local health, nursing and medical practitioners with a central hub to access education events and resources, local news, and an opportunity to network with other health professionals in the South West.

You are invited to come along to the launch and learn more about this new initiative. The event is being held at the Undalup Room, City of Busselton, 2 Southern Drive, Busselton, and you are asked to arrive from 5.30pm for a 6pm start (light refreshments will be provided). For more information, or to RSVP, please email bonnie2@gpdownsouth.com.au, or phone 08 9754 3662.

This event can also be found in the *Education and training* section of this edition.

Co-design workshops for PIP IHI consultation

The Department of Health is currently undertaking a review of the Practice Incentives Program Indigenous Health Incentive (PIP IHI). This review aims to improve the efficiency and effectiveness of the PIP IHI to support general practices to provide appropriate health care to Aboriginal and Torres Strait Islander people with chronic disease.

In addition to the consultation paper (available by visiting <https://bit.ly/2U380An>), the Department has engaged ThinkPlace to facilitate ten face-to-face workshops and a webinar across Australia. These workshops are seeking input from all who have experience delivering health care services associated with the PIP IHI, including advisory and professional bodies from mainstream health, peak body representatives in Indigenous health, and healthcare providers working in metro and regional areas.

The Perth workshop is scheduled for Monday, 1 July from 9am to 1pm (with morning tea provided). At the time of publication, the venue had not yet been confirmed, however interested participants can register by emailing engagePIPIHI@thinkplace.com.au to receive an agenda and updated venue information as it becomes available.

Government funded vaccine for individuals at increased risk of serious influenza illness

In 2019 to date, WA Health has distributed over 630,000 doses of influenza vaccine through National Immunisation Program (NIP) and State-funded programs for individuals at increased risk of serious influenza illness; this is 100,000 more doses than the total number of influenza vaccine doses distributed in 2018. In addition, WA Health will receive an additional estimated 30,000 doses of NIP influenza vaccine this week.

Acknowledging the potential for some undercounting and delays in vaccine administration data entry onto the AIR, currently available data show that as of 10 June 2019, 264,000 influenza vaccine doses have been recorded as administered to persons eligible for government-funded vaccine in WA; the difference between this figure and the number of doses distributed to date suggests that a significant number influenza vaccine doses – perhaps several hundred thousand doses - are currently with immunisation providers awaiting administration.

Each year the largest number of influenza vaccinations - and the highest vaccination rate - occurs among persons aged ≥ 65 years. In 2019, this cohort is recommended to receive Flud@ vaccine. Because Flud@ is registered for use only in this age group - and Flud@ is only available through the NIP - it is possible to assess the extent to which NIP vaccine supply is able to meet current demand.

Thus far in 2019 the cumulative influenza vaccine coverage among persons aged 65 years or older as recorded in AIR is 50.6% (solid blue line in the figure below). This represents about a 10% increase in coverage achieved in this age cohort in 2018. As the weekly number of vaccine doses administered to persons ≥ 65 years indicates (pink bars), vaccine uptake in this age group peaked four weeks ago and has been steadily declining since then. Given that WA Health has already distributed enough doses of Flud@ to vaccinate 90% of this age cohort, the number of vaccine doses in located in provider practices should be sufficient to meet anticipated demand in this age group this year.

Current AIR data for individuals aged >6 months to <5 years indicate that influenza vaccine coverage is currently 24.0%, a figure 12.8% higher than at the same time point last year. We urge you to continue to improve vaccination coverage in this vulnerable cohort by actively promoting influenza vaccination of young children to parents in your practice.

To facilitate ongoing, near real-time monitoring of influenza vaccine uptake in WA, please ensure all influenza vaccines you administer are entered onto AIR in a timely manner.

Private market influenza vaccines for patients not eligible for government-procured vaccines

Recognising that WA Health is not involved in regulating, procuring or distributing vaccines in the private sector, we have been provided with general information which may be of interest to providers attempting to procure influenza vaccine in the private market for patients not eligible for government-procured vaccine.

- Additional supplies of private market influenza vaccines have arrived into WA pharmaceutical wholesalers
- These stocks are currently being distributed to immunisation providers through private channels
- Further doses of private market influenza vaccine have arrived in Australia, and will be distributed throughout Australia

DBTeen mental wellbeing skills group for young people & families

DBTeen is a free program that aims to improve the mindfulness, communication and emotional responses of 14 to 18 year olds who are experiencing difficulties managing their emotions and behaviours.

Lifeline WA is being funded by WA Primary Health Alliance to offer multi-familial access to community-based, dialectical behavioural therapy (DBT) in a primary care environment.

Referrals are now open for the July 2019 to December 2019 period, with initial groups to be held in Midland / Swan, Wanneroo, Cockburn, and Gosnells.

The program comprises of 12-weekly, three-hour multi-family group skills sessions (with inter-session phone check-ins and coaching). Cycle 1 Groups commence the week beginning 22 July through to the week beginning 1 November 2019 (with a break for school holidays).

For more information or to refer a patient, please visit Lifeline WA's website at <https://www.lifelinewa.org.au/Services/DBTeen> or email DBTeen@lifelinewa.org.au.

Updated Methamphetamine Treatment Guidelines

Turning Point (<https://www.turningpoint.org.au/>) has released the 2nd edition of the *Methamphetamine Treatment Guidelines*. The guidelines were developed to help health professionals in the clinical management of methamphetamine use disorder and related presentations.

The updated guidelines provide recommendations based on current evidence and best practice for the management of use and withdrawal. The guidelines include:

- management of acute and complex presentations, including behavioural disturbances and polydrug use
- cognitive impairment and comorbid mental health symptoms
- recommendations for reducing harm, including injecting drug use
- working with specific populations, and supporting families

To download the guidelines, please visit <https://bit.ly/2WJ9JR5>.

Accreditation tip – costs associated with care

RACGP *Standards for general practices* 5th edition, Indicators C1.5A and C1.5B

The release of the 5th edition of the *Standards for general practices* saw the introduction of two individual indicators relating to the cost of care for patients when care is initiated by the practice, both within the practice, and for referred or other services. While reference to costs associated with care came under a criterion heading in 4th edition, guidance is now provided in such a way as to differentiate between the expectations of information to be provided around potential costs within, and beyond, the practice.

For care received within your practice, you need to advise patients of the actual out-of-pocket costs they will incur. You will know what the costs are for healthcare you deliver, and therefore you must explicitly state what those costs will be. Ideally, you should have your costs and billing principles displayed at your reception desk (or patient point-of-check-in), as well as on your practice information sheet, and perhaps on your website (if you have one). If your billing principles include bulk billing a certain patient cohort (for many practices, this is determined by age groups or by concession card status), ensure that this is described. It is worth noting at this point that, if your practice only bulk-bills certain patients, it is important that your billing principles are clearly explained and consistently applied, as few things cause more patient complaints than fees and the inconsistent application of bulk-billing. Many practices choose also to remind patients that payment will be required at the time of the appointment.

If a practitioner in your practice has determined that an additional treatment or procedure is necessary, ensure that the practitioner discusses the cost of this with the patient prior to commencing the treatment or procedure. This allows the patient to indicate whether the cost will be prohibitive to receiving the additional service, in which case alternatives can be discussed to ensure the patient is able to access the treatment required within the available means.

This approach informs the second indicator relating to costs associated with care. When referring patients to services outside the practice, you do not need to inform them of the actual cost, but you must inform them when there may be a cost. This allows a discussion to unfold where the patient can identify whether the costs would create a barrier to accessing the referred care. If so, your practitioner can explore alternative methods for the patient to receive care without prohibitive cost. When informing a patient of potential costs, you might discuss whether there is a Medicare rebate, a gap payment, or a private fee, or whether there are public services available. You might also provide the patient with the contact details for the referred service so that the patient can directly discuss costs.

When you are having discussions about potential costs, it is important to ensure that you are delivering the information in a way that your patient understands. If you are concerned about the patient's communication abilities, you may need to engage an interpreting service, provide information in the patient's preferred language, or use plain English or diagrams. Additionally, make sure you consider the patient's communication abilities if you are advising the patient to have discussions relating to cost directly with the provider.

HealthPathways update

The HealthPathways team has now localised 494 pathways

The most recently localised pathways include:

- Fibromyalgia (<https://bit.ly/2WPsSfQ>)
- Painful or swollen joint in child (<https://bit.ly/2Rllq19>)
- Inflammatory Bowel Disease (IBD) (<https://bit.ly/2KnIN4a>)
- Eating Disorders Specialised Assessment (<https://bit.ly/2Fg0yNR>)
- Juvenile Idiopathic Arthritis (JIA) (<https://bit.ly/2KZ6j63>)
- Non-acute General Medicine Assessment (<https://bit.ly/2RllnP>)
- General Medicine Advice (<https://bit.ly/2x3li6E>)
- Acute General Medicine Assessment (seen within 7 days) (<https://bit.ly/2KWzEOt>)
- Multiple Sclerosis (MS) (<https://bit.ly/31FWHD1>)
- Trigeminal Neuralgia (<https://bit.ly/2XVgqfl>)

To access HealthPathways, please contact your WA Primary Health Liaison or email the HealthPathways team at healthpathways@wapha.org.au.

HealthPathways events

GP Update: Tackling issues of aging and life-limiting illness – Helping patients to make the most of life

Presented by East Metropolitan Health Service in partnership with WA Primary Health Alliance and HealthPathways WA.

Date: Saturday, 31 August 2019

Time: 8.00am – 3.30pm

For registration and more information, please email EMHSGPed@health.wa.gov.au

Please see the *Education and Training* section of this newsletter for other upcoming events.

NPS MedicineWise update

NPS MedicineWise are holding a morning event for Registrars at the WA Primary Health Alliance offices on Tuesday, 6 August.

The event is an opportunity to discuss a case study reviewing the management and diagnosis of anxiety disorders.

The event is free and the content is RACGP and ACRRM accredited. A fruit breakfast, tea and coffee will be provided by WA Primary Health Alliance.

Attendance is also available via video link so regional and remote registrars are not excluded from attending.

For more information, including details on registering, please download the flyer by visiting <https://bit.ly/2ZrsohB>.

My Health Record update

Security and digital health

Representatives from the Australian Digital Health Agency (AHDA) held a *Security in Healthcare* workshop in Perth on 12 June.

The session discussed how a security first culture can protect healthcare organisations - prevention being better than cure!

A range of materials can be accessed via the Australian Digital Health Agency website to help promote awareness of information security and provide practical advice:

- General security advice – for keeping healthcare information secure
- My Health Record - managing your security and privacy controls
- Ransomware – preventing and recovering from a ransomware attack
- Update management – keeping healthcare systems and software up to date
- Backup your data – protect your healthcare practice information

The guidance materials can be accessed on the ADHA website by visiting <https://bit.ly/2Rnk1Rp>.

New Pharmacist Shared Medicines List

As a healthcare provider, soon you and your patients will be able to view a list of all Pharmacist Shared Medicines Lists (PSML) that have been uploaded to a My Health Record. This is a list of medicines a consumer is known to be taking including prescribed, over-the-counter (OTC) and complementary medicines at the time the list is created.

A small number of software vendors have started to develop code in their products so that pharmacists can upload PSMLs in clinical practice. It is expected that these capabilities will be progressively rolled out throughout the 2019-20 financial year.

A Pharmacist Shared Medicines List (PSML) contains information about the medicines your patient was known to be taking at the time the list was created. The list includes medicines that have been prescribed to the patient by their doctors and other non-prescription medicines that they may be taking (such as aspirin) and other known over the-counter medicines.

A Pharmacist Shared Medicines List could be created by:

- a pharmacist after completing an in-pharmacy medicine review
- a pharmacist in preparing a dose administration aid
- a hospital pharmacy for patients when they are discharged.

For more information on the Pharmacist Shared Medicines List, please visit <https://bit.ly/2Fclbt2>.

More information

Please contact your Primary Health Liaison or a member of the My Health record team at WAPHA via myhealthrecord@wapha.org.au for assistance.

RACGP GP wellbeing survey

The RACGP has launched the first GP wellbeing survey designed to gain insight and opinions on GP wellbeing in Australian general practice.

By having your say, you will be contributing your experience and assisting the RACGP in understanding the support that is currently accessed, where investment is needed, and the barriers and challenges faced by GPs in relation to wellbeing and mental health.

To complete the survey, please visit <https://bit.ly/2XNj8UO>.

Updated National Pregnancy Care Guidelines

The National Pregnancy Care Guidelines have recently been updated to include new content in the following chapters:

- Chlamydia
- Syphilis
- Pre-term birth
- Prolonged pregnancy
- Cytomegalovirus

The updated Guidelines can be accessed by visiting <https://bit.ly/2WL0Vpm>.

You can also find a suite of Health Professional Summary Sheets, which are based directly on the content of the Pregnancy Care Guidelines, and which include key information such as recommendations, information on tests, and practice summaries. They are designed for health professionals caring for pregnant women and are intended to accompany the Pregnancy Care Guidelines.

The Summary Sheets, along with related Clinical Practice Guidelines, can be accessed by visiting <https://bit.ly/2MV6S3m>.

COPD Flare-up Campaign – This Winter, Come Prepared

During the winter months there are lots of people around who may be unwell with a cold or flu. This can be a dangerous time for someone who has Chronic Obstructive Pulmonary Disease (COPD) and catching these viruses can put them at risk of a flare-up.

COPD is the most common cause of potentially preventable hospitalisations. Preventing a flare-up is important because, if left untreated, it can mean hospitalisation, and each flare-up also does further damage to the lungs. Know the early signs of a flare-up because the sooner treatment is accessed, the quicker their recovery is likely to be. These include:

- Coughing more than usual
- Finding it harder to breathe than usual
- Any change in sputum (phlegm)
- Feeling more tired and less active than usual

The Lung Foundation Australia has collated a *Come Prepared* pack, with resources including posters, flyers and promotional content, for both patients and health professionals. These resources can be downloaded by visiting <https://bit.ly/2XRgQ6V>.

Seeking GPs: survey about chlamydia management in general practice

If you're a GP working in Australian general practice, researchers at the University of Melbourne would like to hear about your chlamydia management practices and your opinion on some proposed strategies to support care of patients with a chlamydia infection.

If you would like to participate, please visit <https://bit.ly/2RjM5VL> or you can find more information by downloading the flyer at <https://bit.ly/2XhqxPa>.

Assessing capacity for patients with a psychological condition

Comcare recognises the critical role general practitioners (GPs) play in helping people with ill health or injury to recover and participate in work. To support this role, they have produced a new resource for GPs on assessing capacity for patients with a psychological condition.

Presented by consultant psychiatrist Dr Dielle Felman, the five minute video provides better practice information and recommendations for treating health practitioners on how to practically assess capacity for work with a psychological condition.

The resource is also useful for those supporting workers with a psychological condition, such as practice nurses, psychologists and physiotherapists, to understand how capacity has been assessed and certified.

The video can be viewed by visiting <https://bit.ly/2WNMbGg>.

Education and training

Visit our Webinars & Workshops page at www.practiceassist.com.au for the events calendar.

Preparing for PIP QI with PEN CS Practice Information Sessions – 18 to 26 June

The new PIP QI is commencing on August 1 2019. WA Primary Health Alliance invites you to attend our series of sessions designed to provide practices with the opportunity to learn about the new Practice Incentives Payments for Quality Improvement (PIP QI) and how to use PEN CS to support ongoing quality improvement in your practice.

If your practice is using or is interested in having the PENCAT4 data extraction tool installed or would like to know more about the Australian Government's new PIP QI payments then consider attending one of our sessions. Interactive sessions will be available for practices who are new to data sharing and quality improvement and experienced used with an advanced knowledge.

In these sessions we will cover:

- what we know about PIP QI so far
- putting together a PIP QI Preparedness Plan
- what is the PENCAT tool and how can it be used to drive QI in general practice
- how to get the most out of using the Pen Clinical Audit Tool (PENCAT)
- interpreting PENCAT data successfully to assist in QI measures within your own practice
- Q&A open forum PENCAT tips and tricks

To register for any of the sessions, please visit http://bit.ly/PENQI_Training_June

Face to face sessions		
Wednesday 19 June	9.00am – 11.00am	Secret Harbour Surf Life Saving Club Secret Harbour Boulevard, Secret Harbour
Friday 21 June	9.00am – 11.00am	Currambine Community Centre 64 Delamere Ave, Currambine
Monday 24 June	9.00am – 11.00am	Helen's Place (Rise Community Network) 41a Great Northern Highway, Middle Swan
Tuesday 25 June	12.00pm – 2.00pm	WA Primary Health Alliance Level 2, 7 Tanunda Drive, Rivervale

Webinar sessions		
Tuesday 18 June (advanced)	10.00am – 12.00pm	A link will be sent to participants once registered
Tuesday 18 June (beginner)	2.00pm – 4.00pm	A link will be sent to participants once registered
Wednesday 19 June (advanced)	2.00pm – 4.00pm	A link will be sent to participants once registered
Thursday 20 June (beginner)	1.00pm – 3.00pm	A link will be sent to participants once registered
Monday 24 June (advanced)	2.30pm – 4.30pm	A link will be sent to participants once registered
Wednesday 26 June (beginner)	12.00pm – 2.00pm	A link will be sent to participants once registered

Course in Ear and Hearing Health – 21 June

The Course in Ear and Hearing Health aims to provide eligible students specific skills and knowledge to perform ear health examinations, basic point of care hearing evaluations, management strategies and referral processes for further or specialist care in relation to a range of conditions, based on detailed knowledge of the anatomy, physiology and pathophysiology of the auditory system.

Date: Friday 21 June 2019
Time: 8.45am – 4.30pm
Venue: Technology Park Function Centre, 2 Brodie-Hall Drive, Bentley WA 6102
Cost: \$475 per person
Register: To register, please visit <https://bit.ly/2JMfJkE>

South West Health Professionals' Network Launch – 26 June

The South West Health Professionals' Network will provide local health, nursing and medical practitioners with a central hub to access education events and resources, local news and an opportunity to network with other health professionals in the South West.

Date: Wednesday 26 June 2019
Time: 6.00pm – 7.30pm (please arrive from 5.30pm)
Venue: Undalup Room, City of Busselton, 2 Southern Drive, Busselton
Cost: Free (light refreshments provided)
Register: RSVP by 21 June by emailing bonniea@gpdownsouth.com.au or phone 08 9754 3662

Antenatal Risk Questionnaire training – 27 June (midwives and practice nurses) and 29 June (GPs)

St John of God Raphael Services is inviting midwives, practice nurses, GPs and obstetricians to attend free workshops, led by Professor Marie-Paule Austin, to understand and apply the psychosocial risk assessment using and scoring the Antenatal Risk Questionnaire (ANRQ).

This training will enable health professionals to identify circumstances that affect a woman's mental health and reduce the potential negative impact on infants and families.

There are two training workshops, one tailored for midwives and practice nurses (<https://bit.ly/2VE6iWJ>), the other for GPs and obstetricians (<https://bit.ly/2JtzkGW>).

Date: Thursday 27 June (midwives & practice nurses); Saturday 29 June (GPs & obstetricians)
Time: 2.00pm - 4.45pm (27 June) and 9.00am – 11.30am (29 June)
Venue: University Club of WA, Entrance 1, Hackett Drive, Crawley WA 6009
Cost: Free
Register: To register, please visit <https://bit.ly/2QbXk1Y>

Aboriginal Health Conference – 6 & 7 July

The 2019 Aboriginal Health Conference **Kids on Country** will emphasise the importance of children and youth in Aboriginal communities and provide a forum to exchange ideas on the key issues relating to the health of Aboriginal children.

To continue to aim for health equity for Aboriginal children and communities, health professionals need an enhanced understanding of culturally competent care and the links between the environment and the health of Aboriginal children.

The presentations and workshops at this conference will cover aspects of clinical care, research, community programs, emerging health issues and social determinants of health. The conference will also identify strategies to support the role of traditional interactions in Aboriginal communities.

Date: Saturday 6 July and Sunday 7 July 2019
Time: 9.00am – 5.30pm (registrations from 8.30am)
Venue: Parmelia Hilton Perth, 14 Mill Street Perth WA 6000
Cost: Please visit <https://bit.ly/2G6982z> for more information, including costs
Register: To register, please visit <https://bit.ly/2EIHNYF>

Advanced Life Support (ALS) – 13 July

Run and accredited by the Australian College of Rural and Remote Medicine, this one-day Advanced Life Support (ALS) course was developed to meet the needs of general practitioners in the management of common emergencies in rural practice. The course incorporates key aspects of Advanced Life Support skills in accordance with the Australian Resuscitation Council guidelines.

The course is conducted by expert instructors experienced in rural general practice.

Date: Saturday 13 July 2019
Time: TBC
Venue: Mercure Perth, Irwin St Perth WA 6000
Cost: \$1,395 (ACRRM members), \$1,545 (non-members)
Register: To register, please visit <https://bit.ly/2w4p1AM>

Rural Emergency Obstetrics training – 14 July

Rural Emergency Obstetrics Training (REOT) is a one-day workshop designed to equip non-obstetric practitioners with vital emergency obstetric skills.

REOT is relevant to any type of doctor, in any location. This course covers normal birthing procedures as well as common birthing emergencies. It will boost your skills and confidence when dealing with third trimester emergencies.

Date: Sunday 14 July 2019
Time: TBC
Venue: Mercure Perth, Irwin St, Perth WA 6000
Cost: \$1,695 (ACRRM members), \$1,895 (non-members)
Register: To register, please visit <https://bit.ly/30sCosb>

Type 1 Diabetes Education event – 16 July

You are invited to the Type 1 Diabetes Family Centre for an update on the latest information regarding the management of Type 1 Diabetes along with the opportunity to tour the facilities available to your patients and their families.

Find out more about

- new technologies
- updates on current research
- Hypoglycaemia prevention strategies
- dietary strategies
- sick day diabetes management

Date: Tuesday 16 July 2019
Time: 6.30pm – 8.30pm
Venue: Type 1 Diabetes Family Centre, 11 Limosa Close, Stirling WA 6021
Cost: Free
Register: To register, please visit <https://bit.ly/2WQMkxF>

GPCE Perth – 27 & 28 July

The General Practice Conference & Exhibition (GPCE) <https://bit.ly/2vH47Fy> in Perth is WA's leading CPD event for primary care, and is recognised as one of the most important CPD events on the general practice calendar. GPCE welcomes over 300 healthcare professionals to meet, update knowledge, earn CPD points, and see the latest innovations specific to primary care.

THE GPCE 2019 program has been designed to suit the changing needs of all primary care professionals, with high quality CPD content in four categories.

Practice

These sessions will allow you to update and refresh knowledge, get the latest clinical education, earn CPD points and gain confidence, whilst focusing on practical, simple, useful tips and takeaways.

Business

If your focus for 2019 is improving your business, these sessions will cover the foundations of practice, profitability, team, risk, reputation, systems, operations and more!

Life

Turning the stethoscope round to you! If 2018 has taken the stuffing out of you, these sessions will focus on personal health and well-being, work-life balance, time management, communication skills and more.

Curiosity

Feed your curiosity and learn more about what's new now and what's coming. Covering technology, research, and what others are doing, these sessions are guaranteed to inspire.

Date: Saturday 27 and Sunday 28 July 2019
Time: 8.15am – 4.45pm (education sessions)
Venue: Crown Perth Convention Centre, Great Eastern Highway, Burswood WA 6100
Cost: Please visit <https://bit.ly/2LZMj5g> for delegate admission costs
Register: To register, please visit <https://bit.ly/2w3gHRs>

Better Questions Workshop – 8 August

Do you want to make a bigger difference in people's lives by enabling them to manage their own health, wellbeing and lifestyle choices? The Better Questions workshop offers highly effective communication strategies and practical tips that will enable you to enhance your communication skills and professional practice.

Date: Thursday 8 August 2019
Time: 9.00am – 3.30pm
Venue: The Boulevard Centre, 99 The Boulevard, Floreat WA 6014
Cost: \$330 per person
Register: Please visit <https://bit.ly/2HzUKPm> to download the flyer and registration form

GP Education Event: Shared Care – 17 August

Presented by North Metropolitan Health Service and Sir Charles Gairdner and Osborne Park Health Care Group in partnership with WA Primary Health Alliance and HealthPathways WA.

This event will focus on some areas of healthcare where a collaborative, shared approach between hospital clinicians and GPs will improve patient outcomes.

Presentations will be brief, interactive and case-based.

Final details are still being confirmed, but topics are anticipated to include mental health and other chronic diseases.

Date: Saturday 17 August 2019
Time: 8.30am – 3.30pm (registrations from 8.00am)

Use of Ultrasound in Rural Emergency Medicine – 31 August

The Australian College of Rural and Remote Medicine presents this ultrasound workshop offering an introduction and instruction on the use of Ultrasound in Emergency Medicine, trauma, and critical care for the rural generalist or general practitioner with minimal experience in using ultrasound in practice.

A major feature of this workshop is the 'hands-on' practice using live patient models, guided by highly experienced clinical application specialists, sonographers, and clinicians. This course has been designed to cover more common situations that may arise in the Emergency Department, in practice, or basic anaesthetics. Content may vary course to course dependent on the particular skills of the clinical facilitator.

Date: Saturday 31 August 2019
Time: TBC
Venue: Novotel Perth Langley, 221 Adelaide Terrace, Perth WA 6000
Cost: \$795 (ACRRM members), \$1,015 (non-members)
Register: To register, please visit <https://bit.ly/2Qbqggh>

ACNP National Conference – 2 to 5 September

The Australian College of Nurse Practitioners (ACNP) is holding its National Conference in Melbourne from 2 to 5 September 2019.

The ACNP Conference is a fantastic opportunity to bring together Nurse Practitioners, Advanced Practice Nurses and Health Professionals. As the flagship event for the Australian College of Nurse Practitioners, the theme 'Transforming Health Care' recognises the dimensions of practice and contribution made by Nurse Practitioners and Advanced Practice Nurses across Australia.

Date: Monday 2 September to Thursday 5 September 2019
Time: 8.30am – 5.00pm daily
Venue: Pullman Melbourne Albert Park, 65 Queens Rd, Albert Park VIC 3004
Cost: For more information, including costs, please visit <https://bit.ly/2HzW2tG>
Register: To register, please visit <https://bit.ly/2HuvwmR>

Australasian Sexual Health Conference & Australasian HIV&AIDS Joint Conference – 16 to 19 September

The Australasian Sexual Health Alliance (<https://bit.ly/30xRkFM>) seeks to use the Australasian Sexual Health Conference (<https://bit.ly/2Hvnev7>) to achieve its purpose of acknowledging and building on the specific expertise of sector partners in our common aims of improving national and local responses to sexual health in Australasia, in supporting and collaborating with close neighbouring countries to achieve these objectives.

The Australasian HIV&AIDS Conference (27th Annual Conference of the Australasian Society for HIV, Viral Hepatitis and Sexual Health Medicine - <https://bit.ly/2JRHqJc>) is the premier HIV Conference in Australia and the Asia and Pacific region. The annual conference is run by ASHM (<https://bit.ly/2Qb2bR6>) as a platform for the dissemination and presentation of new and innovative research findings across the Australasian HIV sector.

Date: Monday 16 September to Thursday 19 September 2019
Time: 7.00am – 5.00pm daily (please visit <https://bit.ly/2LVkfju> for the program)
Venue: Perth Convention and Exhibition Centre, 21 Mounts Bay Rd, Perth WA 6000
Cost: Please visit <https://bit.ly/30ukSDU> for information on delegate costs
Register: To register, please visit <https://bit.ly/2JOLZnn>

19 June is Red Apple Day

A highlight of Bowel Cancer Awareness Month is Red Apple Day (Wednesday, 19 June 2019), when Australians are encouraged to support the vital work of Bowel Cancer Australia through the purchase of a Bowel Cancer Awareness Ribbon and apple-themed fundraising activities.

Bowel Cancer Australia's apple logo is symbolic of the charity's bowel cancer message: bowel cancer is treatable and beatable if detected early.

The outline of Bowel Cancer Australia's apple logo appears as an abstract of a human bowel. The small hole in the apple is caused by a worm. If detected early and removed, the worm is unable to continue affecting the apple or the health of the tree.

It's the same with people. If bowel cancer is detected early it can be successfully treated, which means patients and their families can continue to enjoy a healthy life.

Both red and green apples are also a nutritious source of dietary fibre.

Red Apple Pins and Bowel Cancer Awareness Ribbons (as well as other merchandise) can be purchased from the Bowel Cancer Australia online store at <https://bit.ly/2LVVeF8>.

For details on hosting a Red Apple Day fundraising event, visit the Planning Your Fundraiser webpage at <https://bit.ly/2QcMngP>.

28 July is World Hepatitis Day

World Hepatitis Day 2019 is on Sunday 28 July 2019, with the aim of raising awareness around viral hepatitis and the impact it has worldwide. The theme for World Hepatitis Day 2019 is "Find the Missing Millions", with a focus on finding people living with hepatitis who are undiagnosed and linking them to care.

With effective viral hepatitis treatments available to help manage hepatitis B and cure hepatitis C, Australia is leading the way to a future without viral hepatitis. However, an estimated 233,947 Australians are living with chronic hepatitis B (CHB) and 182,144 with chronic hepatitis C (CHC), at risk of preventable deaths from cirrhosis and liver cancer. With close to have a million Australians living with chronic hepatitis B and C, it is likely that there is someone who attends your practice living with hepatitis. It is vital for primary care providers to know the risk factors, test and diagnose people living with hepatitis, to enable treatment to start early enough to halt serious liver damage.

Resources for healthcare providers can be found on the Australasian Society for HIV, Viral Hepatitis and Sexual Health Medicine website <https://ashm.org.au/news/world-hepatitis-day-2019/>.

Extensive resources have been developed to support participation in World Hepatitis Day 2019, and these can be accessed by visiting <http://www.worldhepatitisday.org/>.
