Webinar information:

Western Australia is currently experiencing a syphilis outbreak, with increases in cases of infectious syphilis and congenital syphilis in the community. This has prompted changes to recommendations to clinical practice that are relevant to general practitioners.

This webinar will address:

- clinical presentations of syphilis
- testing, including current protocols recommended during pregnancy
- management, including principles of care when engaging with culturally and linguistically diverse populations.

Webinar details:

 **Thursday 21 March 2024**

 **6pm – 7pm (AWST)**
