

Dear Doctors, Practice Nurses and Staff

Alcohol and drug issues in general practice

Our team of WA drug and alcohol specialists have developed educational resources to enhance the skills of GPs looking after patients with common alcohol and other drug problems e.g. alcohol dependence, benzodiazepines and methamphetamine use. Please see <http://www.ecu.edu.au/tadpole> for more information.

We'd like to offer you the opportunity of having a small group education session in your practice. This is free and qualifies for RACGP CPD points. The facilitator (an addiction specialist or a GP with a special interest in addiction) will give a short presentation about alcohol or other drug topics of interest followed by 30 minutes to talk through case studies or any concerns you have about your patients.

We will supply lunch/ snacks and accreditation for 2 RACGP CPD points in the 2020-2022 triennium.

Interested?

- Choose one hour between 12 and 2pm or 5:30 to 6:30pm, Tuesday through Friday.
- Choose topics of interest (usually 2 per hour). *See over page.*
- Email SIRCH@ecu.edu.au and we will get back to you to confirm arrangements.

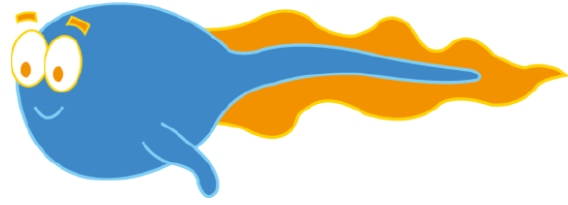

We hope these sessions are of interest and look forward to hearing from you.

Yours faithfully

Professor Moira Sim & Dr Eric Khong
