

Advance care planning is an important step in ensuring a person's preferences and values are known at the end of their life. General practice has an opportunity to start these discussions with patients because trust has already been established.

WA Primary Health Alliance is working with Hammond Care to support Western Australian general practices to implement a team-based approach to initiating advance care planning and palliative care into everyday clinical practice. The Advance Project is a practical, evidence-based toolkit and training package, specifically designed to support general practices to deliver team-based care.

I would like to offer you the opportunity to hold an information session for all practice staff. The event will be held at your location and convenience, where possible. The session will take 1 hour depending on questions you may have. If this is something you would be interested in, please speak to your WA Primary Health Alliance Liaison or Coordinator. You can also contact me directly.

Regards

Rose Adamson

Aged Care Project Lead – The Advance Project
