

## WAPHA GP LEARNING

# Dementia Demystified

## Webinar 2 – Diagnosing Dementia: A Structured Approach

Join us for the second webinar in the Dementia Demystified series by Dementia Training Australia's expert medical education team.

This webinar will cover the following topics:

- Apply the Inclusion and Exclusion Criteria Frameworks in assessing patients for a possible diagnosis of Alzheimer's dementia.
- Identify and address modifiable risk factors to help prevent, delay the onset and slow the progression of dementia.

To register for webinar 2, [click here](#) or scan the QR code.

The Dementia Demystified webinar series provides a practical and stepwise approach to improving knowledge, skills and confidence in dementia recognition, diagnosis and management within the general practice setting.

The webinars are designed for GPs, however general practice nurses and primary care health professionals are also welcome to attend.

Each webinar is accredited for 1 RACGP EA CPD hour.

### [Webinar 3 – Thursday 3 July 2025 at 6pm](#)

#### Immediate Post Diagnostic Management

- Recognise the changing goals of care with the progression of dementia.
- Implement an effective management plan for people living with dementia.
