

Fact Sheet V2 / April 2021

# How to access AIR through My Health Record and find a patient's immunisation history

My Health Record allows GPs and practice nurses to easily find a patient's immunisation history in the Australian Immunisation Register (AIR).

If your practice is registered for My Health Record, you can view the date of a patient's immunisation as well as other key information stored within their Australian immunisation history.

The quick reference guides below demonstrate how to access AIR through My Health Record via Best Practice or Medical Director and find a patient's AIR information.

If you require support for a different type of clinical software, email the WA Primary Health Alliance (WAPHA) Digital Health team via <u>ehealth@wapha.org.au</u> or visit the <u>My Health Record website</u>.

## Accessing AIR through My Health Record via Best Practice

1. In a patient's clinical record, click on the 'My Health Record' button
