November	Recommend a reminder for the infant immunisation	Recall for 2026 program
December	Recommend a reminder for the infant immunisation	Recall for 2026 program

Abrysvo is recommended for pregnant women between 28 weeks and 36 weeks gestation.

Beyfortus is only given if mother did not receive Abrysvo or if the dose was administered within 2 weeks or less of giving birth.

Beyfortus will be available from 1 April 2025 for all eligible infants born from 1 October 2024 until 30 September 2025.

Beyfortus should also be administered to Aboriginal and other medically at-risk children entering their second winter season (refer to the WA Department of Health immunisation website for more information).

Please note: the above chart is not indicative for the Pilbara and Kimberley regions of WA.

For further details, visit the [2025 WA Respiratory Syncytial Virus \(RSV\) Infant and Maternal Immunisation Program](#) webpage.
