

Primary Sense Reports for Smoking Recorded

Primary Sense can provide reports based on real-time data, allowing practices to monitor performance and focus on clinical outcomes. The features and functionality of reports can support roles across the practice team. Generated reports are automatically saved to a folder on the computer, enabling data comparison over time.

Accessing reports for Smoking Recorded

At the top of the Primary Sense sidebar menu: click **Reports** and select keyword filter: **Smoking**

Quick tip!
Clicking on column headings will rearrange the report results to enable focus via factors such as age or CV risk.
